

This figure displays a sequence alignment of various TGFBR genes across 1000 amino acids. The alignment is color-coded to represent hydrophobicity, with blue indicating hydrophilic regions and red indicating hydrophobic regions. The genes shown include 34867104.m, 27881429.m, TAK1.h, 38090629.m, 31206007.i, 17647993.f, 24649132.f, 24648518.f, 17544328.w, 17508441.w, lias_TGFBR, 23612315.z, and 21312828.m. The alignment highlights conserved regions and variations between the different genes.
